

### Raptor Road Survey Test

Please identify each raptor in the photo. All raptors are native to Calvert County or are seen somewhat often. Please identify the species of the bird as well as its age (juvenile or adult) and sex. Name 2 identifying features that you used to make the identification. Remember some species cannot be aged or sexed by sight. Some photos will have the rough size listed others will not as sometimes it can be hard to judge size in the field. You may use field guides to take this test just like you would use them in the field.

Answers may be typed in an email and sent to [gene.groshon@calvertcountymd.gov](mailto:gene.groshon@calvertcountymd.gov)

1)

2)

mourning dove sized

3)

4)

crow sized

5)

6)

7)

8)

9)

larger than a red winged blackbird haha

10)

11)

12)

blue jay sized

13)

14)

15)

16)

17)

larger than a crow

18)
